REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The prior art of record fail to disclose a method of detecting a resistive path in a non-volatile memory device that comprises at least one array of memory cells arranged in sectors organized in rows and columns, the sectors being adapted to be erased independently from each one by an erase algorithm, the memory cell array being associated with at least one row decoding circuit per sector, each the portion being supplied with positive and negative voltages, the method comprising the steps of forcing a read condition onto any incompletely erased sector, scanning the rows of the sector to check the possible presence of a spurious current, and finding a row where the spurious current flows and electrically isolating it by re-addressing the row to a redundant row provided in the same sector (claim 1); a memory device comprising a sectored array of memory cells arranged in rows and columns, with at least one row decode circuit portion per sector being supplied positive and negative voltages, characterized in that it comprises a redundant row block within each sector and a compare block being input a reference signal from a redundant row and a row signal taken at one end of a row of the array being read (claim 11)

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
